NOTE TO USERS OF CENSUS DATA

While the 1970 Census data is the newest and best data available, it should be noted that it is already a year old. Some sections of the City of Boston have experienced population movements even in the short time since the Census was taken. The UCS RESEARCH DEPARTMENT feels that the numbers enumerated in its Census publications should be used as indicators of population and housing situations, rather than as absolute figures. In addition to these factors, the Census Bureau, in order to avoid the identification of individuals, as a matter of policy suppresses data for any group of individuals smaller than a given number. In our publications, categories in which data has been suppressed are indicated by an asterisk (*) beside the figures.

Census tract numbers which end in the number "99" are tracts for cruising vessels in various areas of Boston Harbor. However, in almost all cases, data for these tracts are suppressed.

1970 CENSUS OF POPULATION AND HOUSING - FOURTH COUNT SUMMARY DATA

Explanatory Note

The data contained in the Population and Housing Fourth Count were collected by the Bureau of the Census on a sample basis, and have been weighted to approximate an actual count in the population. The excerpts of the data published by the UCS RESEARCH DEPARTMENT have been taken from a computer tape, and an explanation of some of the terms used is included below:

- 1) Total Family Income . . . only the income of family members 14 years old and over is included in family income.
- 2) Occupation . . . occupation is given for those 14 years old or over. The occupation breakdown is as follows:

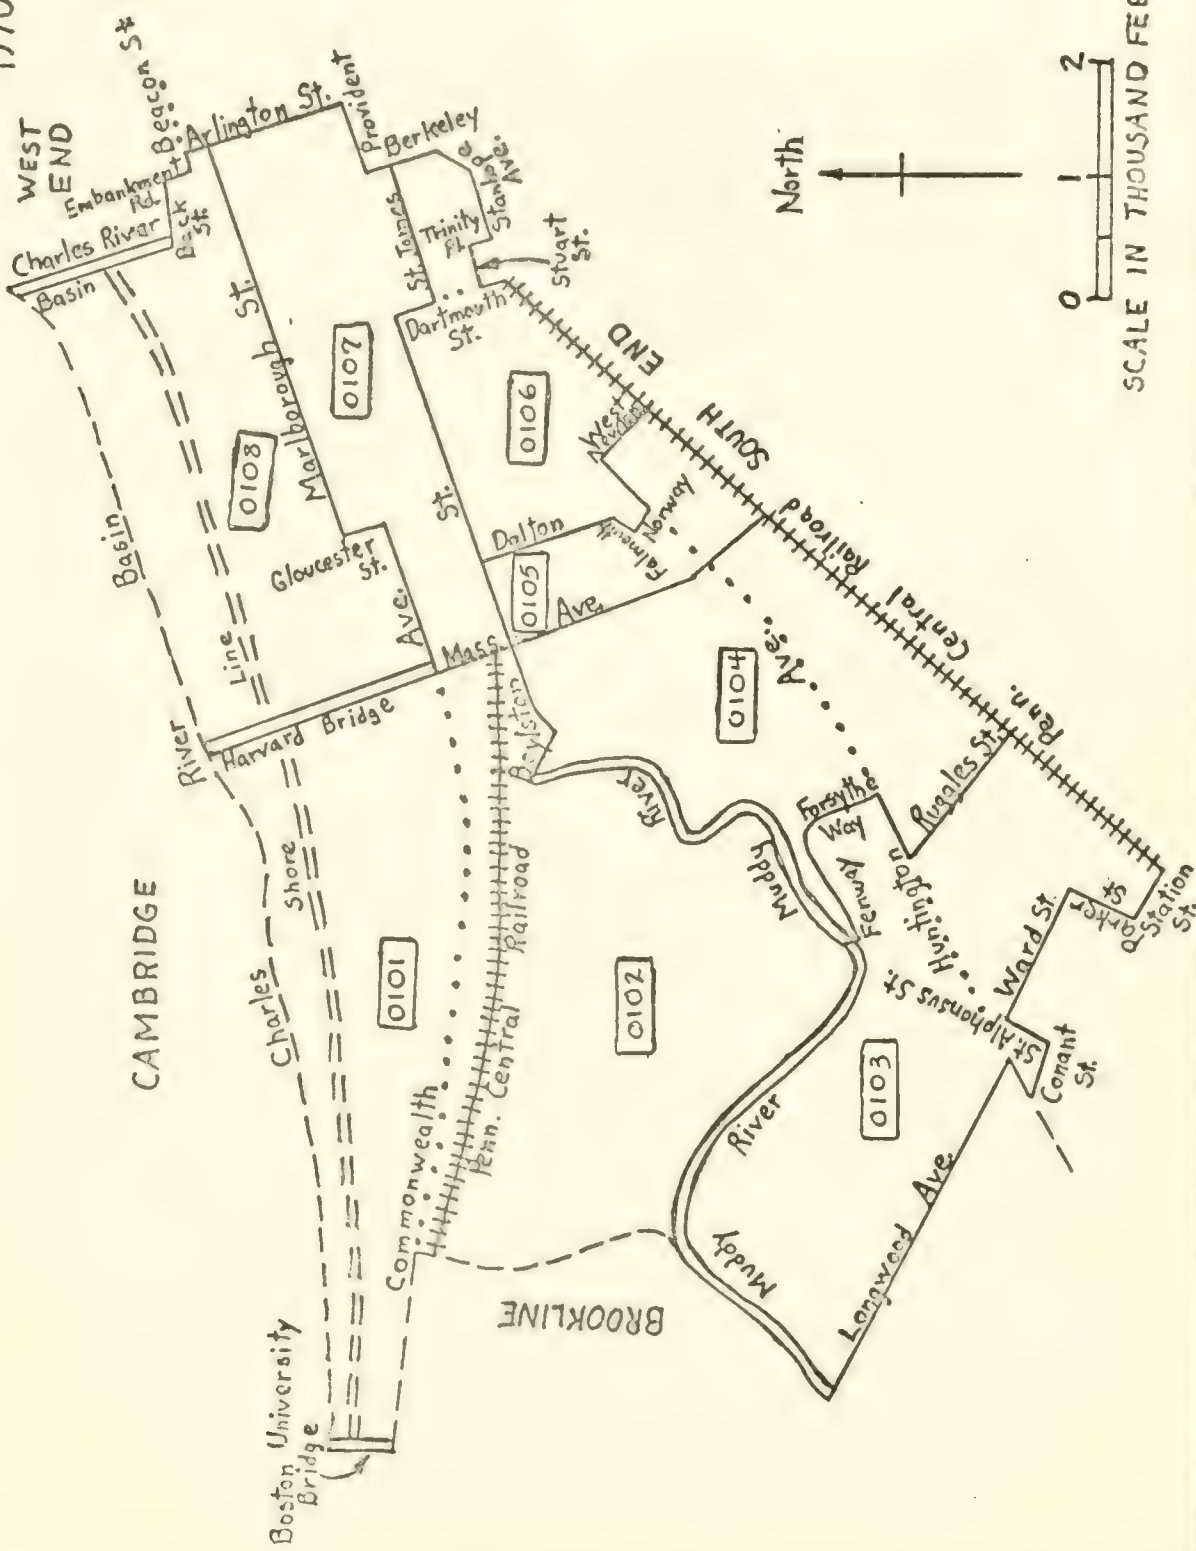

Professional, technical.... managers, administratives....
salesworkers clerical workers.... craftsmen, foremen
operatives (except transportation).... transportation equipment
operatives.... laborers (except farm laborers).... service
workers (except private household workers).... private household
workers.... farm workers.... occupations not reported.

- 3) Years School Completed . . . for persons 25 years old and over.
- 4) Country of origin information on country of origin is provided for "foreign stock", i.e., the foreign-born population and the native population of foreign or mixed parentage. Natives of foreign parentage whose parents were born in different countries are classified according to the country of birth of the father. Natives of mixed parentage are classified according to the country of birth of the foreign-born parent. Scandinavia includes Norway, Sweden, Denmark and Finland. Eastern European includes Poland, Czechoslovakia, Austria, Hungary, Yugoslavia and Lithuania. Other European includes all other Europe. Other Asian includes Southwestern Asia, Japan and other Asia.

For the information presented for the Spanish population, Spanish is defined as "Persons of Spanish Language" -- those whose "Mother Tongue" was reported as Spanish, (Mother Tongue is defined as the language spoken in the person's home when he was a child) and all other persons in families in which the head or wife reported Spanish as his or her mother tongue.
